

Data-Driven Resilience: Shaping the Future of Enterprise Risk Management

6 November 2024

15.00 - 17.00 (GMT +8)

| **FREE Limited Seat***

This webinar will emphasize the critical role that data and technology play in building robust risk management frameworks for the future. It will explore how leveraging advanced data analytics, cloud computing, and other technological innovations can enhance organizations' resilience in the face of evolving risks.

With insights from industry leaders, participants will gain an understanding of how data-driven approaches are transforming enterprise risk management. The discussion will also cover the specific impacts of these technological advancements on the financial services industry, highlighting best practices for integrating data-driven strategies into risk management processes.
